

## Financing Advantage

Discover how the LG Financing Advantage Program\* can save you time, money and more

Acquiring the right technology at the right time for your business can be challenging. As a result, companies turn to lease financing as the preferred method of acquisition to overcome the many drawbacks of equipment ownership.

LG will assist you in evaluating your business requirements, technology investments, and obsolescence risks to assess the overall advantages of lease financing.

### MAINTAIN YOUR COMPETITIVE ADVANTAGE

Unlike cash purchases, leasing enables you to maintain a competitive position with the latest technology because you have the flexibility to easily add or upgrade equipment at any point during the lease.

### FINANCE 100% WITH LOWER UPFRONT COSTS

Leasing enables you to finance your total technology solution since you can bundle equipment, software, services, and associated costs (installation and maintenance) into the lease.

### ACCELERATE TECHNOLOGY ACQUISITION

Unlike capital acquisitions, lease financing can eliminate the need for lengthy internal budget requests and allow working capital to be used for other purposes.

### STREAMLINE BUDGETING

When lease payments are fixed over the term of the lease, budgeting is more predictable and easier to manage.

### PRESERVE YOUR CREDIT LIMITS

Lease financing gives you an alternative financing source that enables you to acquire equipment without tying up other valuable credit lines.

### PROTECT AGAINST OBSOLESCENCE

Leasing provides one of the most manageable and economical ways of keeping up with technological changes. You can be more responsive to a changing business climate by using the latest technology while matching equipment capacity to your needs.

### TAILOR YOUR TERMS AND PAYMENTS

Your lease can be structured with the optimal term and payment frequency to satisfy your budget and meet your company's own unique business requirements.
